

GFCI USER ATTACHABLE IN-LINE GFCI AND TRIPLE TAP FOR ELECTRIC CORD REELS

Tower's Model 30396502-08 is specifically designed for wiring onto any electric cord reel at the user end of the power cord. Adding this GFCI to the cord reel power cord adds ground fault protection and is OSHA compliant.

The inline GFCI provides easy access to the line side cord attachment compartment and it can be used with power cord gauges 16/3, 14/3 and 12/3 SJTW. Grommets are provided for each of the cord gauges along with strain relief hardware. Wiring can be done quickly and the GFCI can be unwired if necessary.

The green "Power ON" indicator light lets the user know that electric current is available for tools and equipment.

The GFCI has a manual reset feature which prevents unintentional equipment start-up.

MODEL 30396502-08

FEATURES

MODEL 30396502-08

- Compatible with 15 amp U-ground outlets and plugs, 2 or 3 wire
- Trip level 4-6 mA
- UL and CUL listed
- Manual reset type GFCI
- Rated for indoor and outdoor use

SPECIFICATIONS

- Class "A" people protection GFCI
- Rated for 125 volt, 15 amp use
- 1875 watts, 60 Hz
- LED Power "ON" indicator
- Open neutral and ground neutral protection
- Operating temperature range -35 degree C to 66 degree C
- Impact resistant case
